KLOVER

Built Faster. Built Smarter. **Built With Klover.**

PRODUCTS

BYPASS FRAMING

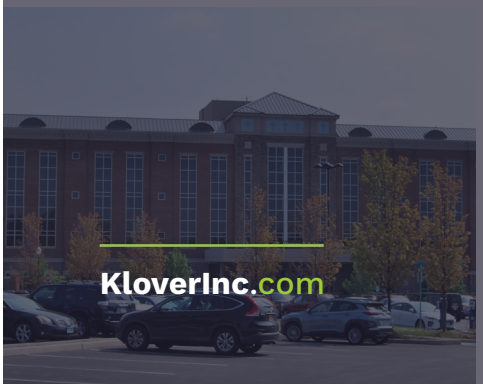
KWG-C STANDARD FRAME SERIES

BYPASS FRAMING + PREFABRICATION

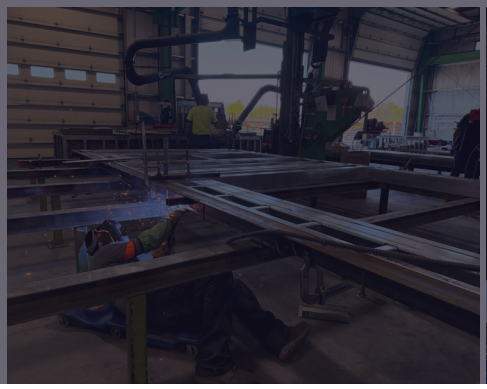
Factory Built. Weather Ready.

Designed for non-load-bearing exterior wall applications, the KWG-C Weather Guard Series combines engineered bypass framing with advanced prefabrication to move more of the building-envelope assembly off-site.

KWG-C WEATHER GUARD SERIES



KloverInc.com



KLOVER 35 YEARS OF EXCELLENCE

SPEED

More Completed Off-Site.
Prefabricated bypass framing panels arrive with key exterior wall components already installed, reducing field labor and installation steps while helping accelerate building enclosure and overall project schedules.

PRECISION

Controlled Prefabrication.
Bypass framing, sheathing, barriers, insulation, blocking, and other selected components are assembled in a controlled environment for greater dimensional accuracy, consistency, and quality.

PERFORMANCE

Built for Faster Enclosure.
Integrating critical building-envelope components into the prefabrication process reduces weather-related field work and helps projects reach a protected building faster with more predictable results.

Product Overview

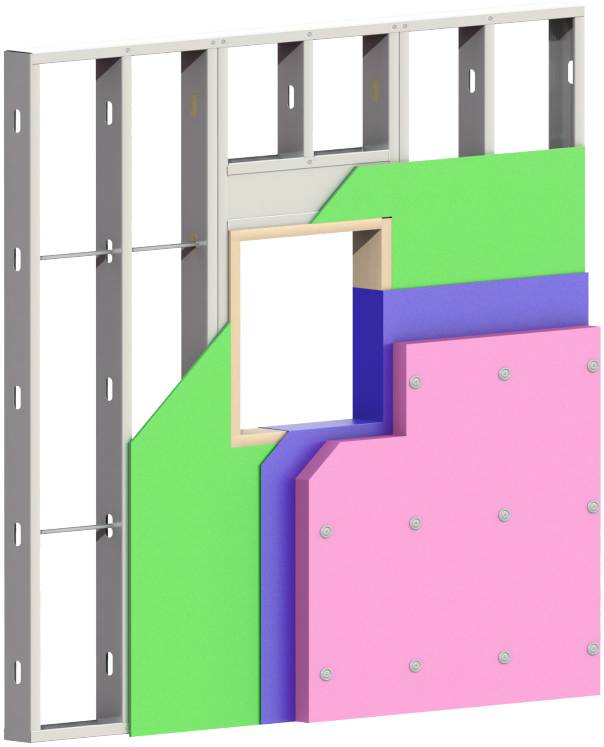
The **KWG-C Weather Guard Series** is Klover's prefabricated bypass framing system designed to move more of the exterior wall and building-envelope assembly into our controlled manufacturing environment.

Built on the KSF-C cold formed steel frame, KWG-C combines engineered bypass framing with off-site prefabrication to create a more complete exterior wall assembly before panels arrive at the jobsite. Exterior glass mat sheathing comes standard, while air/water barrier systems, rigid insulation, wood blocking, brick anchors, and other specified components can be integrated into the panel during fabrication.

By combining bypass framing and prefabrication into one coordinated system, Klover helps reduce weather-related field work, minimize installation steps, improve consistency, and accelerate building enclosure. The result is a factory-built solution designed to deliver greater speed, quality, safety, and schedule certainty from fabrication through installation.

Panel Features

KWG-C WEATHER GUARD SERIES
BYPASS FRAMING



1. **Klover Standard Frame Series Panel**
2. **Wood Blocking at Openings** (Optional)
3. **Exterior Glass Mat Sheathing** (Standard)
4. **Air/Water Barrier System** (Optional)
5. **Rigid Insulation** (Optional)
6. **Factory-Installed Anchors (**Optional)
7. **Swaged Studs -** Help Prevent Sheathing Flare
8. **Dimpled Tracks -** Help Eliminate Fastener Standoff
